EDUCATION

MS, Data Science

Willamette University | Portland, OR

BS, Biology

Northwest University | Kirkland, WA

SKILLS

Platforms

- Databricks
- Tableau
- dbt
- Sigma Computing

Technical Skills

- Python
- Claude Code
- SQL
- Neural Networks
- Statistical Analysis
- Machine Learning
- Application development
- Data Visualization

Professional Skills

- Consulting
- Enablement
- Leadership
- Strategic AI adoption
- Deliver technical trainings
- Project and client management
- Effective communication
- Composure under pressure

CERTIFICATIONS

Databricks Certified Data

Analyst Associate

Databricks | Jun 2026 - Jun 2028

Sigma Delivery Fundamentals

Sigma Computing | Mar 2026 - Mar 2028

Tableau Certified Data Analyst

Tableau | May 2025 - May 2027

SUMMARY

Data scientist and analytics consultant with a background in biology, healthcare, and clinical research, now focused on helping enterprise clients adopt and scale the Databricks platform. Skilled at translating ambiguous business problems into clear technical strategy. Adept at building and managing relationships- from hands-on users to executive stakeholders- to ensure lasting adoption of new platforms. Currently leading a large healthcare enterprise client's migration to Databricks, backed by a foundation in statistical analysis, machine learning, and applied data science.

WORK EXPERIENCE

Analytics Consultant

2025 - Present

InterWorks | Portland, OR

I partner directly with enterprise clients, ranging from healthcare to technology, to build data products and lead analytics strategy, with deep focus on Databricks implementation and adoption.

- Leading a large enterprise client's migration to and adoption of Databricks, from architecture design through rollout
- Designing and deploying end-to-end analytics solutions across Databricks, Sigma, dbt and Tableau
- Translating ambiguous business problems into clear, actionable data products
- Authoring technical blogs and earning certifications to stay sharp on the tools I use for consulting
- Delivering technical trainings and webinars, and developing enablement materials to drive end-user adoption

Data Analyst | Project Manager

2024 - 2025

New Heights Clinic | Vancouver, WA

As the clinic expanded, I led several pivotal initiatives to enhance patient care and operational efficiency. My work involved:

- Conducting in-depth patient data analysis to tailor services to community needs
- Implementing the clinic's first Electronic Medical Record (transitioning from paper charts)
- Analyzing and improving the clinic's processes to provide more efficient and quality patient care

Data Analyst | Office Manager

2022 - 2025

Main Street Family Medicine | Vancouver, WA

In this role, I spearheaded data-driven initiatives to enhance patient care and operational efficiency. Key projects included:

- Developing automated scripts to analyze healthcare and company financial data
- Building custom applications for our unique business model
- Managing our website
- Launching continuous training initiatives, fostering a growth-oriented team culture

Research Assistant 2

2021 - 2022

Oregon Health & Science University | Portland, OR

It was here I discovered my passion for data science. While developing many hard skills necessary for neuroscience bench work, I also:

- Learned MATLAB to analyze my research data
- Used Adobe Illustrator to create figures and display my research findings
- Used custom scripts to collect data from my two-photon microscopy experiments
